

Atlas Portal - Project Proposal (controlled demo)

The project goal is to build a web portal for customer support tickets.

The portal will let customers submit tickets and track support responses.

Milestones: requirements sign-off on 12 September 2026; API prototype on 20 September 2026; integration testing on 27 September 2026; pilot delivery on 30 September 2026.

Deliverables: a React frontend, a ticket API, a database schema, and a testing report.

Priya owns backend API development. Arjun owns the frontend. Meera owns testing.
